Temporary allocation of non-allocated funds															
1 Mutual Funds															0,00
2 Sight Deposits															483,75
3 Equity portfolio of companies listed in the ASE															0,00
Total non-allocated balance															483,75

* Taking into consideration that the Share Capital increase took place on 12/28/1999, the anticipated investments for the fiscal years 1999, 2000, 2001 will be covered in the fiscal years of 2000, 2001, 2002, 2003.

Notes:

In order for THEMELIODOMI S.A. to be classified in the new higher class, the 7th class of the Contracting Companies' Register of the Ministry for the Environment, Physical Planning and Public Works, it proceeded with the following: on one hand the merger by manner of absorption of NESTOS S.A. and on the other hand the takeover and, in turn, the merger by manner of absorption of five (5) more contracting companies, of which three (3) belonged to class G and two (2) to class F of the Contracting Companies' Register. As a result, following the changes in the Group, it was imperative that new business planning actions be undertaken, something that affected the use of the capital, as set forth below: 1) Mechanical Equipment. Increase of the total allocated funds compared to the anticipated by the Prospectus, for the enhancement of the current equipment. 2) Organization-Modernization. The sums originally stipulated in the Prospectus remained stable and will be used as part of the reorganisation of the new Group - in the form of a contracting company, by means of obtaining the new certificate. 3) Working Capital. It is fixed anew at € 8,588.22 thousand and will be used for the purpose of realising the company's construction projects and covering the production-related expenditures of the public works of a substantial cost estimate undertaken within 2002 as well as the ones it is expected to undertake within 2003. 4) Participation in self financed projects. a) Self financed Projects: Decrease of the total allocated amount compared to the anticipated by the Prospectus, since the junction of highways, as well as the self-financed projects (highways) delayed significantly. b) Privatization program: Decrease of the total allocated funds compared to the anticipated by the Prospectus, since the company participates in the first bidding competition for the privatization of the HELEXPO, amounting to GrD 5.1 billion with a 20% participation and despite the fact that the company made the highest bid, the competition was declared void. The remaining companies of the Public sector have not announced the particular time and procedure of privatization. c) Parking Stations. Decrease of the total allocated amount compared to the Prospectus, since the amount is adequate to cover the needs from 2002 until 2003 for the construction of the parking lot in Veria (already started), the parking lot in Ioannina where the relative contract has been signed and the construction will be started as soon as the needed permissions are issued by the Authorities, the parking lot in Larissa and in Kalamaria Thessaloniki. 5) Development of subsidiaries. a) Acquisitions and formation of network of companies. Increase in the total sum to be used pertaining to the provisions of the Prospectus. aa) Takeover by 100% and merger by manner of absorption of the companies set forth below: I) TECHNIKI MACEDONIAS S.A. (TEMAK S.A.), II) EVRODODI S.A., III) V. PAGONIS S.A., IV) PRODOMI S.A. and V) P. ANASTASSIOULID. The total price of the takeovers is € 27.057.98 thousand. It is noted that the aforementioned prices are lower than the values of the companies mentioned above, as contained in the valuation reports of an international auditing company and presented in the Merger Prospectus in August 2002. ab) Takeover by 65% - at a total price of € 650 thousand - of the German company THOLANDER Ablufttechnik GmbH, which engages in air pollutants' treatment systems. The respective sum provided for has already been used as a whole by 30.06.2003. b) Energy projects. Decrease of the total allocated fund compared to the anticipated by the Prospectus, since the materialization of this program has begun, with the creation of self-funding subsidiaries. c) Real Estate Management. Increase of the total allocated fund, taking into consideration that the company is willing to significantly develop this sector, by realizing further investments. The respective sum provided for has already been used as a whole by 30.06.2003, whereas the excess recorded sum of € 7,059.74 thousand pertains to the finalisation of the contracts and the purchase of 25% of the ALLATINI plot within the second quarter of 2003, which was realised after the Ministerial Resolutions were passed (January 2003) that permitted the erection and determined the building coefficients, whereas at the time when the Extraordinary General Meeting was held (on 25.11.2002) the said purchase was considered to be uncertain. d) Participation in subsidiaries' share capital increase. Increase of the total allocated fund, taking into consideration that the company is willing to significantly further strengthen its subsidiaries, by realizing further investments. 6) Agrotourism projects. Decrease of the total allocated fund compared to the anticipated by the Prospectus, since the respective investment program is covered by its subsidiary TOPOS S.A. 7) Business expansion in the Balkan Countries Market. Decrease of the allocated fund compared to the Prospectus, since the design for the acquisition of a Bulgarian company, based in Sofia was aborted, as well as the expansion of the activities in other Balkan countries will take place through subsidiaries, which will be self-financed. 8) Temporary allocation of non-allocated balance. The non-allocated balance of 483.75 thousand Euro approximately, until the exhaustion of investments according to the ones mentioned in page 19 of the Prospectus, has been placed in low-risk investments as it is analyzed in the table above. It is noted that, the amount invested in Mutual Funds as well as the amount of investments in shares of listed companies, related to the temporary allocations as stated above, and relate to acquisition values. It is also noted that, the term "low-risk investments" has been taken from the ratified Prospectus (page 19). Changes in the type of investments, due to the circumstances of the sector and of the wider changes of the Economy, as well as any deviations anticipated in the Prospectus, an implementation timetable will be placed for approval at the Ordinary Annual Shareholders' Meeting.
